

Visual Studio Installation Walkthrough

Following these instructions will install Visual Studio 2017 Community Edition.

- Visit <https://www.visualstudio.com/downloads/> and select the left-most option to download.

- Right click on the Visual Studio installation program and choose Run as Administrator.
- The first screen will ask you to click next and allow it to download the rest of the installer. Go ahead and do so.

- When it comes back you'll be presented with a large list of potential component to install. Check the box in the top, right corner of the indicated 3 options here, .NET desktop development, ASP.NET and web development and Node.js development. Then click Install. ****Be sure you have enough disk space on the target drive. This will take over 7GB.**

Installing — Visual Studio Community 2017 — 15.6.7

Workloads Individual components Language packs

Windows (3)

 **Universal Windows Platform development**
Create applications for the Universal Windows Platform with C#, VB, JavaScript, or optionally C++.
